

### Line Air Filter (LA-filter)

These LA-filters utilized when either clean air is required or longer components (Air control valve, Vacuum release valve and airejector) life is desired.

Specially, LA-filter is useful for **Online pump**.

**VTA-0814**  
**1014**  
**1214**

### Operating specifications

Model	Tube size ØA(O.D)	Removal efficiency (µ)	Working temperature	Weight (g)	Filter Element Model
VTA-0814	8	20	-20°C~+80°C	37	VTE-1022
VTA-1014	10	20	-20°C~+80°C	40	
VTA-1214	12	20	-20°C~+80°C	52	

### Line Vacuum Filter (LV-filter)

These filters provide a cost effective in line vacuum filtration method. The 6mm push fit version is useful for individual lines particularly with **the Online pump & Multiple stack pumps**.

The 3/8" Version can be screwed directly into the Mini type vacuum pump as well as any other port using a 3/8"-BSP connection, when used with **the mini pumps & midimultiple pumps it provides a very compact set up**.

**VTF06-IN**

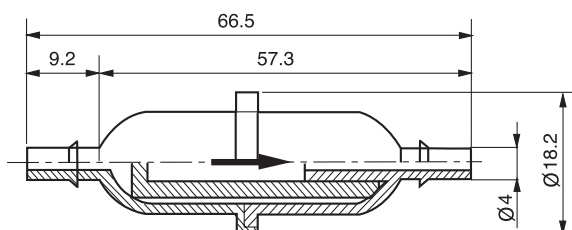

**VTF38-IN**

### Operating specifications

Model	Port Size	Internal Volume (cm <sup>3</sup> )	Removal efficiency (µ)	Material	Working temperature	Weight (g)
VTF06-IN	Ø4(inner)	4	20	PP, PE	0°C~80°C	4
VTF38-IN	3/8"	20	20	PP, PE	0°C~80°C	14

**VTF06-IN**
